(Women's Health and Aging Study, screening and baseline interviews, 1992-1995)

¹ All variables have less than 1% missing data. Results are based on non-missing data.

² Descriptive statistics are based on weighted data.

³ No ADL difficulty; disabled in two or more domains (see Chapter 1).

⁴ The screener question is in the form "Has a doctor ever told you that you had (a) . . . ?" The presence of the condition was confirmed in the baseline interview.

⁵ Have you ever had coronary artery bypass surgery?

⁶ Has a doctor ever told you that you had intermittent claudication or pain in your legs from blockage of the arteries (peripheral vascular disease or atherosclerosis)?

⁷ Have you ever had surgery on the arteries in your legs?

⁸ The question is in the form "Has a doctor ever told you that you had . . . ?"
